

SUMEGHA GONDALIYA

Senior Software Engineer (.NET)

+91 910 628 0625 | sumegha137@gmail.com | Bengaluru, KA, India - 560067

SUMMARY

I am an **AWS Certified Solution Architect** and **Senior Software Engineer – Full Stack** with over 8 years of experience specializing in developing scalable applications in financial and enterprise sectors. Skilled in cloud transformation and ASP.NET technologies, I have a proven history of modernizing systems and improving delivery processes. My focus is on driving innovation through cloud-native development and Generative AI tools in complex environments

WORK HISTORY

Senior Software Engineer

Commonwealth Bank of Australia

📅 06/2022 - Present 📍 Bengaluru, KA, India

A prominent bank in Australia focusing on innovation and advanced technology

- Spearheaded the migration projects of Kafka consumers from Java to .NET helping in business continuity to mitigate risk with great problem-solving skills
- Played a pivotal role as an early contributor in end-to-end stream migration as a subject matter expert (SME)
- Engineered a digital banking solution to automate manual tracking of application status which will directly impact to the end users and reduce calls 100%
- Developed microservices using .NET Core APIs. Architected backend infrastructure on AWS cloud for scalable systems and collaborated with UI/UX teams for best user experience
- Implemented CI/CD pipelines using GitHub Actions and TeamCity contributing in DevSecOps model
- Contributed to QA processes enhancing system reliability by 90%
- Leveraged Generative AI tools to accelerate development cycles, code review process and testing by 50-60%
- Collaborated with international teams across time zones to deliver high-impact solutions with great communication skills
